<th>Action</th>
<th>Presenter</th>
</tr>
</thead>
</table>
| 9:00am – 9:20am   | Welcome, Opening, and Director’s Report | • Approval of IG17  
                     • Meeting Report  
                     • Approval of IG18 Agenda  
                     • GFF Director opening remarks                                                 | For endorsement | IG Co-chairs, GFF Director, and Head of GFF Secretariat                   |
| 9:20am – 10:45am  | Strategy Update                     | • Head of Secretariat Strategy Update  
                     • Overview of three key thematic areas for discussion:  
                       o Gender  
                       o Health financing  
                       o CSO engagement                                             | For guidance   | GFF Secretariat                                                           |
| 10:45am – 11:00am | Break                               |                                                                                     |               |                                                                           |
| 11:00am – 11:45pm | Climate and Health Update           | Presentation of climate and health approach paper that will be integrated in the current strategy and will serve as building block for the next strategy | For endorsement | GFF Secretariat                                                           |
| 11:45pm – 12:25pm | IG Discussion                       | Discussion on ensuring the Investors Group mandate and ways of working is fit for purpose | For discussion | GFF Secretariat                                                           |
| 12:25pm – 12:30pm | Meeting Closure                     | Summary key decision points and next steps                                            | For discussion | IG co-Chairs                                                              |
UPDATE ON GFF’S APPROACH TO GENDER EQUALITY
2019: GFF Roadmap for advancing Gender Equality identifying 6 action areas

1. Prioritize analytical and technical support demonstrating the relationship between gender inequality and poor health outcomes.
2. Increase country investments in gender-responsive monitoring and data systems.
3. Support the foundations for gender-transformative reforms to remove the barriers for the integration of SRHR and gender equality.
4. Intensify engagement with local women’s organizations, youth groups.
5. Create a supportive environment to empower women and girls as leaders.
6. Strengthen country-level engagement beyond the health sector.

2021: New GFF strategy 2021–2025

Strategic direction #2 – advancing equity, and gender equality
**EXAMPLES OF GFF KEY INVESTMENTS**

**Key investments**

Since 2022, the GFF has provided analytical and technical support to GFF countries, through the WBG teams, and other partners, to inform the design and implementation of strategies and projects to improve gender equality.

The evidence from this work will inform ongoing roadmap implementation and the next GFF strategy.

**Key investments**

Over the past two years, the GFF has supported utilization and quality of gender-responsive monitoring and evaluation data and analytics in GFF-supported countries.

A notable investment is the Monitoring and Action for Gender and Equity (MAGE) technical partnership with Johns Hopkins University.

**Key investments**

To increase capacity, the GFF has hired a full-time legal gender specialist and specialized consultants and established a cross-sectoral policy task force within the WBG. Partnerships have been leveraged such as:

i) United Nations Population Fund (UNFPA) to support target countries;

ii) Human Reproduction Program (HRP)/WHO to provide country assessments on access to legal and safe abortion and consent for FP;

iii) WBG’s Women, Business and the Law (WBL) unit to test data collection and assess legal and policy frameworks in Sub-Saharan Africa.

**Gender-responsive monitoring and data systems**

**Gender-transformative legal and policy reforms**

**Demonstrating the relationship between gender inequality and poor health outcomes**
Key investments

Beyond the partnership with WBG Governance Practice, GFF has developed close collaboration with WBG's two regional flagship programs on women's empowerment—the Sahel Women's Empowerment and Demographic Dividend (SWEDD) and East Africa Girls' Empowerment and Resilience (EAGER).

Other sectors are the WBG’s Gender Global Practice to ensure that SRHR and women’s leadership in health were highlighted as priorities in the WBG’s new gender strategy 2024–2030.

Key investments

GFF–JHU collaboration to generate evidence from 14 countries in Africa on the role and impact of women’s leadership in health.

Collaboration with the WBG’s Governance Practice to produce analysis on female vs. male health worker demographics in several GFF partner countries to drive efforts for women’s professional progress in health.

The GFF has piloted the “Greater Leaders Program” to coach current and upcoming women leaders in the health sector.

Key investments

Implementation via the CSO and youth engagement framework 2021–2025 supported by a US$5 million project with grants to local and youth CSOs.

Engagement with youth and women’s organizations

Create a supportive environment to empower women and girls as leaders

Strengthen engagement beyond the health sector

Examples of GFF key investments
KPI are helping to track progress and identify challenges

Using a cascade approach key results are as follows:

1. One or more gender equality gaps, barriers, or challenges related to RMNCAH-N identified.
2. One or more strategies to address the identified gender equality gaps, barriers, or challenges prioritized.
3. A measurement approach to track implementation of the prioritized strategies in place.
4. Implementation of prioritized gender strategies assessed.
5. Measurable progress in closing the RMNCAH-N-related gender gaps and barriers assessed.

- Health-related gender equality gaps have been identified in the majority of GFF partner countries (step 1-2) with 29 out of 33 countries with completed GFF ICs, while strategies to address those gaps were prioritized in 27 of 33 countries.
- Two-thirds (22 out of 33) of GFF partner countries with completed investment cases now have a measurement approach in place to track implementation of the prioritized gender strategies (step 3).
- Implementation has progressed in 16 of the 27 countries with identified priorities (step 4).
- But measurable results (step 5) were evident in only 8 of these countries.
HEALTH FINANCING UPDATE
GFF HEALTH FINANCING PORTFOLIO EVOLUTION

STAGE 1: 2015–2018

Focus on supporting development of health financing strategies and inclusion of health financing strategy priorities in country investment cases

STAGE 2: 2019–PRESENT

Integrate pragmatic, immediate support to health financing reform implementation and advocacy

Trust Fund approval of Domestic Resource Utilization and Mobilization (DRUM) agenda

Aim to conduct RMET annually in every country

Increasing the volume, efficiency, and equity of domestic public resources for RMNCAH–N services whilst ensuring a greater focus, impact, and volume of Development Assistance for Health (DAH)
### GFF HEALTH FINANCING AGENDA THEORY OF CHANGE

<table>
<thead>
<tr>
<th>Outcomes</th>
<th>Objectives</th>
<th>GFF Health Financing Approach</th>
<th>Instruments Leveraged</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Increased equitable access to quality RMNCAH-N services across the GFF portfolio&lt;br&gt;2. More resilient, equitable, and sustainable health financing systems</td>
<td>Improving the adequacy of funding for PHC through allocative and technical efficiency reforms for RMNCAH-N&lt;br&gt;Improving equity in resource distribution for quality RMNCAH-N services&lt;br&gt;Improving transparency and accountability for PHC resources and RMNCAH-N outcomes</td>
<td>Help GFF partnership countries ensure the adequacy of financing for PHC to increase equitable access to quality RMNCAH-N services</td>
<td>Investment Case as a tool for ensuring adequacy of resources&lt;br&gt;Systematic TA for Health Resource Tracking, Donor Alignment, and Country Equity Diagnostics&lt;br&gt;Support for country platforms and use of health resource tracking and equity data&lt;br&gt;Engagement with CSO and youth to support advocacy and accountability and ensure adequacy of PHC resources</td>
</tr>
</tbody>
</table>
WHAT IS DIFFERENT?

Summary of health financing approach refinement

1. Focusing on adequacy of financing (for operational, human resources, and drugs and commodity costs) and recalibrating the focus on domestic resource mobilization

2. Scaling-up RMET support building on lessons learned

3. Doubling down on the equity and gender lens and ensuring that PHC financing is in service of women, children and adolescents.
GFF CIVIL SOCIETY & YOUTH ENGAGEMENT
PROGRESS TO DATE

Multistakeholder Country Engagement

- Improved multistakeholder engagement in countries
- Global Youth Platform, to focus on coordination, resource sharing, and capacity building among young leaders, aims to foster a youth-led movement and ensure representation of youth.
- Increased representation of CSOs and youth in national country platforms as part of program design and implementation.
- Integration of citizen engagement activities within the projects.

GFF Secretariat Staff and Systems

- Governance: Civil society and youth representations in the IG.
- KPIs: Integration of a new KPI to track CSO and youth participation on country platforms and investment case plan development.
- Strategy: Strengthening of CSO and youth engagement and integration into core strategic areas, such as:
  - Health financing: coordination and alignment with the CSO health financing agenda, Joint Learning Agenda on Health Financing for UHC with otherGs and PMNCH
  - Data and evidence: implementation of the ADLAB network to build the evidence on effective adolescent health interventions
  - Collaborating with CSOs and youth on SRHR and gender legal and policy reforms across several countries

NGO Host Partner

Through a World Bank project, the GFF CSO Host Organization is supporting a stronger and independent civil society and youth-led movement through:

Coordinating a strong platform for the GFF CSO and youth constituency.

- Providing technical assistance to empower CSOs and youth to contribute meaningfully to country investment cases and hold governments accountable.
- Allocating small grants for advocacy and accountability.

Since 2022, 51 organizations received small grants – US$2.7 million in total – across 28 GFF partner countries.
CSO AND YLO: LEADING THE WAY ON POLICY AND BUDGET REFORMS

400+ CSO Representatives trained on health financing, UHC advocacy, policy analysis and Community of Practice Established

Cameroon  UHC enrollments increase from 145,000 to 2 million (Aug–Dec 2023)

Ghana  Enhanced capabilities of CSOs, youth leaders, and the media to increase community engagement and advocacy, leading to better focus from Ghana Health Service, District Assemblies, Department of Social Welfare, and Community Development towards health issues.

Niger  Integration of nutrition in the 2024–2029 Communal Development Plans (PDC) and dedicate a budget for malnourished children in their municipalities.

Kenya  17 youth organizations led to the establishment of Kenya’s first Adolescent Health Policy (2024–2030) and the removal of proposed family planning service fees.

Madagascar  Contraceptive budget line increase from 7.8% to 8.48% (2023)

Malawi  Health budget allocation increase from 8.5% to 12.2%, enhancing funding for women’s and adolescents’ health.

Mali  Doubling of the Budget for SRMNCAH, to equip the Zana community health center, reducing patient travel time.

Mozambique  Increased funding and policy support for adolescent sexual and reproductive health.

Sierra Leone  Removal of user fees for maternal health services in the area supported by the co-financed project.

Uganda  Improved funding for reproductive health commodities, increasing the budget allocation by 7%.

Youth Focus  US$449,126
CSO  US$1,436,710
YLO  US$814,164
**KEY LESSONS TO INFORM THE NEXT PHASE OF OUR ENGAGEMENT**

<table>
<thead>
<tr>
<th>Strengthening the enabling environment</th>
</tr>
</thead>
<tbody>
<tr>
<td>• <strong>Strengthening structures</strong> to improve CSO and youth representation and engagement in national policy processes</td>
</tr>
<tr>
<td>• <strong>Strengthening national multi-stakeholder dialogues</strong> and consultations at country level</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Direct support to CSOs and youth</th>
</tr>
</thead>
<tbody>
<tr>
<td>• <strong>Multiyear engagement</strong> for CSOs and youth to sustainably influence policy and programs</td>
</tr>
<tr>
<td>• <strong>Longer-term grants</strong> to support advocacy, accountability, research and impact reporting</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Differentiated technical assistance</th>
</tr>
</thead>
<tbody>
<tr>
<td>• <strong>Increasing demand for TA</strong> in health financing, accountability, and community-level result monitoring</td>
</tr>
<tr>
<td>• <strong>Tiered approach to TA</strong> to better address diversity of needs and countries’ maturity</td>
</tr>
<tr>
<td>• Additional support to <strong>scale up successful projects</strong> and interventions, serving as best practices.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Coordination and collaboration</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Strengthen <strong>coordination and maximize alignment opportunities with partners</strong> the Global Fund, Gavi, PMNCH, Family Planning 2030 (FP2030), UHC 2030 and the United Nations Population Fund (UNFPA) for collective advocacy and accountability (health financing, SRHR/FP advocacy, country commitment monitoring)</td>
</tr>
</tbody>
</table>
GUIDING QUESTIONS FOR STRATEGY DISCUSSION

Do you see any potential opportunities and adjustments to accelerate GFF’s impact on gender equality, health financing and CSOs engagement?

Do you have recommendations and suggestions building on these lessons learned and results for the focus in the upcoming strategy?
Break
AIM OF THE PAPER

• Integrate a climate and health approach into the current GFF Strategy 2021-2025, to provide direction for current GFF operations to address the impacts of climate change on women, adolescents and children, and build resilient health systems that are responsive to their needs.

METHODOLOGY

• Synthesize available evidence and insights to identify specific areas to prioritize.

• Define GFF’s value add through consultations with GFF Secretariat staff, World Bank climate and health staff and key partners (countries, organizations, CSOs and youth).

• Ensure coherence and synergy between GFF efforts and broader global climate and health initiatives.
SYNTHESIS OF EVIDENCE

Impact of climate change (drought, extreme heat, water scarcity, salinity, floods…) on women, adolescent and children’s health:

Women: worsened pregnancy outcomes, higher risk of preeclampsia, gestational hypertension, miscarriages, anemia, or death from severe malaria, preterm births and stillbirths, and increase of intimate partner violence, exposure to STIs/HIV.

Adolescents: unique impacts on mental health and well-being, education and skills for employment, teenage pregnancy, and increased vulnerability to forced sex and child marriages, shifts in age of menarche, anemia, stunting and severe thinness.

Newborn and children: undernutrition, stunting, respiratory infections, diarrheal diseases, low birth weight, vector-borne diseases, immunization disruption, leading to higher risks of premature mortality in children under 5.

Health services: general disruption (shortages of supplies, medicines and health workers), higher degree of difficulty to access health facilities;

Women and adolescents often lack necessary training and knowledge about climate change impacts, reducing their preparedness, and leading to harmful practices in climate-affected areas, whereas they can – and want to – act as agents of change to take forward the climate agenda.
CLIMATE CHANGE IMPACTS ON REPRODUCTIVE, MATERNAL, NEWBORN, CHILD, ADOLESCENT HEALTH

**CLIMATE RELATED HAZARDS**

- Slow-onset climate events
  - Heatwaves, changes in precipitation patterns, ecological degradation, salinity, desertification

- Extreme weather events (disasters)
  - Increased frequency of cyclones, storm surges, wildfires, flash flooding, waterlogging

**SOCIAL, ECONOMIC AND POLITICAL VULNERABILITIES**

- Financial insecurity
- Limited access to healthcare facilities
- Limited mobility
- Higher risk of facing sexual violence
- Gender norms in household which prioritize men in food practices
- Lack of access to potable water, proper sanitation services

**EXISTING HEALTH VULNERABILITIES OF WOMEN, CHILDREN AND ADOLESCENTS**

- Greater risk of heat related morbidity
- More prone to nutritional deficiencies
- Increased susceptibility to diseases and illness during pregnancy and menstruation
- Vulnerability of children to vector and food borne diseases

**RESULTING DISPARITIES IN HEALTH IMPACTS ON WOMEN, CHILDREN AND ADOLESCENTS FROM CLIMATE CHANGE**

- Greater heat-related morbidity and mortality
- Greater mortality during disasters
- Greater prevalence of malnutrition and susceptibility to vector-borne diseases
- Adverse reproductive, maternal and neonatal health outcomes
- Women and adolescents acutely impacted by sexual and gender-based violence during disasters and in conflicts settings
- Increase in mental health burden
Countries like Bangladesh, Kenya, Rwanda, Malawi, Zimbabwe, Indonesia, and Zambia have integrated climate as a priority in their current GFF investment cases.

Most of countries, such as Guinea, Bangladesh, Kenya, Tanzania, Malawi, Madagascar, Ghana, Sierra Leone, Zimbabwe, Indonesia, and Zambia have GFF co-financed World Bank projects either in the pipeline or currently being implemented.

Countries such as Nigeria, Vietnam, Central African Republic, Tanzania, Malawi, Indonesia, Zambia have prioritized climate and health in other projects beyond GFF and World Bank.

18 countries reported that climate and health is a current priority area.
KEY ACTIONS & ENTRY POINTS
DRAWING ON GFF’S POSITIONALITY WITHIN THE WORLD BANK & ITS COMPARATIVE ADVANTAGE, 4 KEY FOCUS AREAS EMERGED, WITH A MAINSTREAMED EQUITY APPROACH

1. Integrate consideration of climate change factors into all aspects of Investment Cases

2. Prioritize and institutionalize consideration of women, children and adolescents in World Bank-supported climate and health efforts

3. Incorporate climate sensitivity and responsiveness in the GFF’s support to data generation and use, monitoring, and results systems

4. Align with GFF partner initiatives to prioritize climate actions within RMNCAH-N programs
LOGIC MODEL FOR INTEGRATION OF CLIMATE AND HEALTH FOR WOMEN, CHILDREN AND ADOLESCENTS INTO THE GFF STRATEGY

**Climate and Health Components by Strategic Direction**

- Strengthen country platforms and alignment for climate action for women, children and adolescents
- CSO advocacy for climate-responsive health budgets and services for women, children and adolescents
- Ensure appropriate technical inputs to co-financed projects
- Maintain focus on increasing financing for PHC as the frontline climate and health interface with women, children and adolescents; and on financial protection for climate-impacted women, children and adolescents
- Strengthen data systems and data use at country level to be more climate responsive for women, children and adolescents

**Technical Assistance**

- Review ICs for climate-related priorities around women, children and adolescents; ensure inclusion of climate-active CSOs on the country platforms (CPs); ensure RMET follows climate-sensitive priorities; capacitate CPs and country leadership on climate change impacts on women, children and adolescents
- Ensure World Bank project designs integrate appropriate climate adaptation and resilience measures for women, children and adolescents; advocate for climate co-benefits related to the needs of women, children and adolescents; incorporate considerations of women, children and adolescents into climate and health vulnerability assessment tool
- Support client to strengthen reforms to increase financing to primary health care level to cover climate adaptation and resilience for women, children and adolescents; revise related insurance benefits and strategic purchasing packages
- Build client capacity to deploy FASTR tools and implementation research for resilience monitoring; ensure inclusion in HMIS of data used to track climate impacts on women, children and adolescents and responsiveness and resilience of health system

**Desired Outcomes**

- Inclusive, sensitized country platforms monitoring prioritized, costed investment cases in countries where climate and health is a priority
- World Bank projects designed and implemented to increase demand for and deliver climate-responsive, resilient services to women, children and adolescents
- Climate-smart HMIS in use to track systems resilience and provision and utilization of RMNCAH-N services

**Integration of climate and health based on GFF operational model**

- Develop internal Secretariat knowledge on climate impacts on women, children and adolescents to inform core activities
PROPOSED GFF PRIORITY ACTIONS AND ACTIVITIES ON CLIMATE AND HEALTH AGAINST THE FIVE STRATEGIC DIRECTIONS IN THE CURRENT GFF STRATEGY

**SD1**
Bolster country leadership and partner alignment behind prioritized investments in health for women, adolescents and children

1. Review investment cases for climate-related priorities around women, adolescents and children
2. Build knowledge in country platforms and country leadership
3. Ensure alignment of partners and other implicated ministries
4. Facilitate multistakeholder platforms that bring together cross-sectoral collaborations

**SD2**
Prioritize efforts to advance equity, voice, and gender equality

1. Include CSOs and relevant private sector and academic groups on country platforms
2. Ensure the inclusion of CSOs
3. Build the capacity of existing CSO platforms
4. Leverage GFF reach to national leadership to catalyze an enabling environment for CSOs
PROPOSED GFF PRIORITY ACTIONS AND ACTIVITIES ON CLIMATE AND HEALTH AGAINST THE FIVE STRATEGIC DIRECTIONS IN THE CURRENT GFF STRATEGY

**SD3**
Protect and promote high-quality, essential health services by reimagining service delivery

1. Support partner countries to develop social and behavior change campaigns
2. Review country climate-risk management protocols
3. Provide TA to WB task teams and partner countries to develop resilient health systems responsive to women, adolescents and children
4. Provide TA to develop public-private partnerships for scaled climate-sensitive, climate-resilient health services
5. Work with the WB to revise Climate Health and Vulnerability Assessment tool

**SD4**
Build more resilient, equitable, and sustainable health financing systems

1. Facilitate relationships between ministries of Health, Environment and Finance to fund and advocate for disaster preparedness plans that protect the health of women, adolescents and children
2. Support innovative financing mechanisms
3. Incorporate climate considerations and costs specific to women, children and adolescents into reforms
4. Accessing multilateral funding
5. Support climate vulnerable communities to access funding for gender-responsive strategies
6. Consider tracking financing for climate and health in RMET exercises
PROPOSED GFF PRIORITY ACTIONS AND ACTIVITIES ON CLIMATE AND HEALTH AGAINST THE FIVE STRATEGIC DIRECTIONS IN THE CURRENT GFF STRATEGY

SD5
Sustain a relentless focus on results

1. Incorporate climate-related RMNCAH-N outcomes in the FASTR tool
2. Enable routine monitoring of EHS utilization and rapidly respond to emerging health priorities
3. Provide TA to build and undertake health facility and household surveys under FASTR
4. Understand climate shocks and thresholds, and develop early warning systems
5. Conduct qualitative deep dives to understand exemplar countries able to protect women, children and adolescents during climate events
6. Provide TA to undertake implementation research to improve responsiveness of health system
7. Coordinate with partners to ensure complementary (on data generation strategies)
NEXT STEP: GFF’S OPERATIONAL WORK
SPECIFIC ACTIVITIES THE GFF SECRETARIAT WILL UNDERTAKE TO ADVANCE THIS WORK UNTIL THE NEXT STRATEGY

Upskill technical and country-facing GFF staff to better engage with partners on climate and health.

Ensure new tools, methods and standards integrate climate impacts on women, children and adolescent health.

Develop technical partnership with partner organizations (e.g. IG members) already involved in climate and health actions.

Finance CHVAs in at least 20 GFF partner countries, in collaboration with the World Bank.

Ensure that GFF Secretariat staff can access relevant climate and health expertise to review and strengthen GFF investment cases.

Collaborate with the Joint Learning Network’s new pillar on climate and health.

Participate in major climate and health global fora to advocate for a strong focus on women, children and adolescents.

Work with the GFF Results team to develop a monitoring and accountability plan.
Discussion on Maximizing the Investors Group
IG—CURRENT ROLES AND RESPONSIBILITIES

IG serves as an advisory board to the GFF Trust Fund Committee (TFC) and the GFF Secretariat, as well as a forum for collective action and alignment towards improving women, children and adolescent health.

The IG carries to the following functions:

<table>
<thead>
<tr>
<th>Strategic Guidance</th>
<th>Provide strategic advice to the TFC and the GFF Secretariat for trust fund priority setting, policies and operational strategies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advocacy and Partnership</td>
<td>Advocate for increased global and domestic attention and investment for women, children and adolescents and promote the role of the GFF partnership in advancing this agenda</td>
</tr>
<tr>
<td>Alignment and Coordination</td>
<td>Foster joint ownership of the GFF as a facility focusing on partner collaboration and alignment around country platforms and country-led, prioritized national health plans</td>
</tr>
<tr>
<td>Monitoring and Mutual accountability</td>
<td>Monitor the progress of the GFF partnership and ensure mutual accountability for delivering on the partnership commitments and objectives at global and country level</td>
</tr>
<tr>
<td>Knowledge Sharing</td>
<td>Share best practices and foster innovation and learning from country and global experiences.</td>
</tr>
</tbody>
</table>
KEY OUTCOMES AND RECOMMENDATIONS FROM 2019 INVESTORS GROUP REVIEW

Led by a task team of IG principal partners which included a desk review, in-depth interviews, and various consultations, the following are the key outcomes and recommendations:

- Instituted a co-chair function which includes a country representative
- Added a dedicated youth representative seat and added an additional civil society representative seat
- Expanded number of country representatives to match the number of Trust Fund donors
- Reduced to one face-to-face IG meeting a year in effort to minimize duplication, reduce cost, and enhance quality of deliberations
- Established and implemented a committee tied to functions on (1) country engagement and (2) monitoring country progress
INVESTORS GROUP: CURRENT WAYS OF WORKING

• The IG discussions inform TFC agenda and deliberations through its continued engagement.
• The GFF Secretariat, in collaboration with the cochairs, prepares the agenda of the IG meetings.
  IG members can request the IG to consider additional agenda items.
• Two Investors Group meetings per year
  o One virtual
  o One in-person in a GFF partner country
• Background documents circulated in advance of IG meetings, with certain exceptions as advised by the cochairs.
• IG minutes are prepared by the Secretariat and made public on the GFF website, alongside the final version of slide presentations and papers prepared for the meeting.
• Time-bound working groups on various thematic areas (e.g., SRHR, climate and health, private sector). IG representation is also foreseen through other steering bodies (Lusaka, evaluation) to ensure representation of broader GFF partnership.
WHY THIS DISCUSSION NOW?

Needs: Enabling greater collective action at global and country level against plateauing outcomes and push back against women and adolescent health

Current shift in the wider health ecosystem: Responding to the need for greater collaboration and alignment of partnerships with countries in the lead – ensuring the global health architecture is supportive of country efforts

Timing: Coincide with evaluation process and inform the next strategy development, including on maximizing GFF governance arrangements
Is it the right time to take stock of how best to maximize the Investors Group ahead of the strategy development?

Do partners support forming a time bound, working group to review the effectiveness and impact of the IG and propose recommendations on the IG to inform the next strategy?

Does the IG have initial guidance on how to ensure the right balance between country and global partnership opportunities, along with trade-offs?
Discussion
Meeting Closure
