In July 2019, the External Cooperation division within the planning unit of Haiti’s Ministry of Public Health and Population launched a resource mapping of funding—both national budget and external financing—in the health sector. Among the objectives of this resource mapping exercise is an assessment of how available financing maps to budgetary requirements outlined in sectoral strategies and plans. These strategies and plans include the country-led investment case that is under development, key reforms in the health sector, and geographic distribution of funds. Haiti plans to complete its resource mapping by 2020.

Resource Mapping

Haiti

Country Focus Areas

- Introduce a paradigm shift to improve donor coordination and enhance effectiveness of foreign aid, in support of efforts to improve utilization and impact of available resources.
- Develop a community health strategy and implementation plans to increase the efficiency and scale of service delivery and use.
- Improve the efficiency of available resources in the health sector using program-based budgeting and a transition towards managing by results.
- Develop a strategic plan (2020-2030) for rationalizing human resources with a particular focus on achieving a more effective distribution and mix of human resource categories throughout the country.
- Map and track resources in order to improve the coordination and efficiency of external resources for health, which have shrunk.
- Improve the national supply and distribution system for medical commodities (SNADI) to guarantee an ongoing availability and accessibility to essential medicines at each health service delivery point across the country.

RMNCAH-N Core Indicators

- Maternal mortality ratio: 529 per 100,000 live births
- Neonatal mortality ratio: 32 per 1,000 live births
- Under-five mortality ratio: 81 per 1,000 live births
- Adolescent birth rate: 56 per 1,000 women
- Percent of births <24 months after the preceding birth: 17.8%
- Stunting among children under 5 years of age: 21.9%
- Moderate to severe wasting among children under 5 years of age: 3.6%
- Incidence of catastrophic and impoverishing health expenditures: 11.54% catastrophic, 2.62% impoverishing

Health Financing Core Indicators

- Health expenditure per capita financed from domestic sources: US$5.79
- Ratio of government health expenditure to total government expenditures: 4.42%
- Percent of current health expenditures on primary/ outpatient health care: 74.24%
- Civil registration and vital statistics (CRVS) used as a priority for RMNCAH-N

Management of medicines and supplies / supply chain interventions

- Supply chain / commodity management not identified as a priority

SCORES

1. Investment Case for RMNCAH-N or equivalent (e.g., national health plan)
2. Set of evidence based priorities financed
3. Results monitoring strategy and framework in support of IC
4. Country-led multi-stakeholder platform (e.g., new or established from an existing platform)
5. Government focal point

HIV/PLHIV

- HIV-prevention strategies have been implemented
- HIV-prevention funded

Monitoring the Country-Led Process

1. Investment Case in Development
2. Investment Case complete
3. Investment Case being implemented
4. Not prioritized within available funding
5. Priorities determined, but financial gap remains
6. Priorities fully funded

An inclusive country platform process with CSO engagement

1. CORED not included in the process
2. CORED identified
3. Civil society representative of national country platform meetings to discuss IC implementation and results

World Bank-funded project in support of the IC

1. Project under preparation
2. Project approved and available online
3. Project disbursing

Private sector engagement

1. Private sector engagement identified
2. Country has either included or identified a private sector intervention
3. Country has started implementing a private sector intervention

Other Areas of Interest

- CRVS identified as a priority
- CRVS priority funded (for RMNCAH-N)
- Country has started implementing a private sector intervention
- Country platform (or other country led entity) uses available online monitoring capacity to assess results arising from implementing the IC and corrective action
- Suppliers identified with contact available online (GTF website)

*** ANC4 = four antenatal care visits
** Meaning that funding was allocated, disbursed and released – payment done

Health financing in progress

1. Not considered at this time
2. Development not yet integrated in IC
3. Health financing in progress

Civil registration and vital statistics (CRVS) identified as a priority in the investment case

OGD = oral rehydration solution; PMTCT = prevention of mother-to-child transmission; PMTCT = prevention of mother-to-child transmission; SMART = simplified treatment regimens; UNAIDS = United Nations Joint Programme on HIV/AIDS; “success” is defined as a sustained reduction of deaths (primary outcome), incidence, and prevalence; ART = antiretroviral therapy; ARV = antiretroviral.
