**Investment Case being Developed but not Established** and Initial Country Platform

**Indonesia**

**Country Focus Areas**
- Establish a management and accountability system to implement the Vice President’s National Strategy to Accelerate Stunting Prevention through a multisectoral convergence approach, including improving services at the community level and strengthening citizen engagement.
- Improve the effectiveness of public resources by introducing performance assessment of fiscal transfers to districts and villages.
- Develop tools for tracking government expenditures on priority nutrition interventions, in order to enhance accountability for results.
- Support the roll-out of innovative technology solutions to deliver services and improve citizen engagement at scale, such as village convergence scorecard, child-length mat, and mobilization of Human Development Worker (HDW) to empower 70,000+ villages to converge services and use fiscal transfers for stunting reduction.
- Support sustainable public awareness and behavior change among communities through targeted and locally-adjusted interpersonal communication, continued advocacy to the decision makers, and capacity building.
- Support agenda-setting analytics in strategic emerging areas, such as private sector engagement, civil registration and vital statistics, digital applications for HDW, and adolescent nutrition.

**RMNCAH-N Core Indicators**
- Maternal mortality ratio: 305 per 100,000 live births
- Neonatal mortality ratio: 13 per 1,000 live births
- Under-five mortality ratio: 32 per 1,000 live births
- Adolescent birth rate: 36 per 1,000 women
- Percent of births <24 months after the preceding birth: 9%
- Stunting among children under 5 years of age: 30.8%
- Moderate to severe wasting among children under 5 years of age: 10.2%

**Health Financing Core Indicators**
- Health expenditure per capita financed from domestic sources: US$49.90
- Ratio of government health expenditure to total government expenditures: 8.31%
- Percent of current health expenditures on primary/outpatient health care: Not available
- Incidence of catastrophic and impoverishing health expenditures: 3.01% catastrophic, 0.31% impoverishing

**Resource Mapping**
Since Indonesia’s investment case is focused on nutrition, the country’s resource mapping covers multiple sectors. Indonesia’s National Planning Agency and Ministry of Finance are leading a multisectoral expenditure tracking assessment with support from the World Bank and GFF. This exercise also includes multi-sector resource mapping. Results were completed in early 2019.

**Country-led Multi-stakeholder Platform**
- Not yet established
- Established and initial meeting held
- Country platform holds regular country meetings to discuss results arising from implementing the IC and corrective action

**Results monitoring strategy and framework in support of IC**
- Not developed
- Development of initial assessment of results monitoring capacity available
- Country platform for all country-led entity cases result framework to review progress as a regular basis

**Country Platform Focus Point**
- Government focal point
- Government focal point not yet identified
- Government focal point identified
- Government focal point identified with contact available online

**Resource Mapping**
- Not yet prioritized within available funding
- Priorities determined, but financial gap remains
- Priorities fully funded

**Set of evidence based priorities financed**
- Not prioritized within available funding
- Priorities determined, but financial gap remains
- Priorities fully funded

**Investment Case for RMNCAH-N or equivalent**
- Investment Case in Development
- Investment Case complete
- Investment Case being implemented

**Contact**

*MC = maternal and child health, ART = antiretroviral therapy, ARV = antiretroviral, DPT3 = vaccination for Diphtheria, Tetanus, and Pertussis, ORS = oral rehydration solution, PMTCT = prevention of mother-to-child transmission, PNG = pastel green.
