Investment Case being Established and initial Developed and initial

COUNTRY PLATFORM Developed but not approved and project approved and established from an existing platform

Tanzania

Country Focus Areas
- Improve efficiency by scaling up output-based payment mechanisms.
- Continue to strengthen the alignment of partners and reduce fragmentation through health basket funding.
- Preserve government budget allocations for health in addition to increased donor resources.
- Strengthen direct health facility financing, in order to empower primary health facilities to provide services, improve the quality of care, and address health system bottlenecks.
- Track progress and help decision makers at all levels to reduce maternal and neonatal mortality by utilizing data from quarterly RMNCAH scorecard.

RMNCAH-N Core Indicators
Maternal mortality ratio: 556 per 100,000 live births
Neonatal mortality ratio: 23 per 1,000 live births
Under-five mortality ratio: 67 per 1,000 live births
Adolescent birth rate: 133 per 1,000 women
Percent of births <24 months after the preceding birth: 18.8%
Stunting among children under 5 years of age: 34%
Moderate to severe wasting among children under 5 years of age: 4.4%

Health Financing Core Indicators
Health expenditure per capita financed from domestic sources: $US14.42
Ratio of government health expenditure to total government expenditures: 9.52%
Percent of current health expenditures on primary/outpatient health care: 46.89%
Incidence of catastrophic and impoverishing health expenditures: 3.79% catastrophic, 1.38% impoverishing

RMNCAH-N

Tanzania is embarking on a One Plan process of its One Plan 5 investment case. As part of this process, they are conducting an updated resource mapping process. Based on initial estimates, compared to the previous year estimates, the gap has increased from 5% to 13%, with GRAVH foods reduced. The governments of Canada, Denmark, Ireland, and Switzerland; KOFAC; and the World Bank have contributed to the progress on its mid-term review.
